

### 3 Medical Expense Subsidy Programs

#### (1) Medical Expense Subsidy for Those with Severe Mental/Physical Disabilities

When a holder of a Physical Disability Certificate (Grade 1, 2 or 3) or an Intellectual Disability Certificate (㉠, A, ㉢) receives medical treatment at a medical institution, out-of-pocket medical expenses are partially subsidized. Please note that there are income restrictions.

Please also note that a patient needs to pay 200 yen per day for each medical institution. (For inpatient treatment, the patient has to pay 200 yen/day up to 14 days a month for each medical facility; for outpatient treatment, the patient has to pay 200 yen/day up to four days a month for each medical institution.)

Some cities/towns may implement expansion of eligibility.

#### (2) Medical Expense Subsidy for Children

When a child receives medical services at a medical institution, out-of-pocket medical expenses are partially subsidized.

The child medical subsidy program is operated mainly by each municipality.

The contents of the program, including age limits for eligible children, income limits and copayment amounts, vary from municipality to municipality. For details, contact the municipal government office of your residence.

#### (3) Medical Expense Subsidy for Single-Parent Households

When the parent or child (until March 31 immediately following the day when they reach 18 years of age) in a single-parent household visits a medical institution, out-of-pocket medical expenses are partially subsidized.

The single-parent household medical subsidy program is operated mainly by each municipality.

The contents of the program including the income limits and copayment amounts to be paid vary by municipality. For details, contact the municipal government office of your residence.

#### (4) Medical Expense Subsidy for Prematurely Born Babies

There is a medical subsidy program for babies who were born premature and require hospital treatment. All or part of medical expenses are subsidized for babies who meet certain requirements. Please note that the subsidy amount is capped depending on the income level of the guardians. You can apply for both the Medical Subsidy for Premature Babies program and the Medical Expense Subsidy for Children. Please note that there are income limits.

For details, contact the municipal government office of your residence.

#### (5) Subsidy for Self-Reliance Support Medical Care

Ninety percent of the costs of self-reliance support medical care that is necessary to alleviate physical or mental disabilities is covered by the person’s health insurance and public funds. As for the remaining 10% of the costs, the amount of the monthly upper limit is set depending on the income level of household. The amount exceeding the upper limit will be covered by public funds.

Medical services eligible for this subsidy program are as follows:

①	Medical care for disabled children	Medical care provided for those aged under 18 who have a disability or disease that can cause a physical disability if left untreated, when treatment is expected to produce positive effects
②	Rehabilitation care	Medical care aimed at removing or reducing physical impairments so that persons can perform daily activities as independently as possible
③	Outpatient psychiatric care	Outpatient medical services provided for persons with mental disabilities, aimed at promoting outpatient psychiatric care and spreading proper medical care

#### (6) Medical Expense Subsidy for Treatment of Tuberculosis/Infectious Diseases

To promote appropriate treatment of tuberculosis (TB) and other infectious diseases, there is a subsidy program to subsidize the medical expenses spent for the treatment of TB and some infectious diseases (Ebola hemorrhagic fever, Middle East respiratory syndrome [MERS], etc.). Health insurance and public funds will cover 95% to 100% of the eligible medical expenses. Please note, however, that there are limits based on income.

(7) Medical Expense Subsidy for Treatment of Specific Pediatric Chronic Diseases

When a person under 20 years of age (under 18 years of age in the case of new application) receives treatment at a medical institution for a specific pediatric chronic disease, their medical expenses are partially subsidized. The subsidized amount is calculated by subtracting the approved “maximum copayment amount” from the amount after health insurance benefits are applied.

(8) Medical Expense Subsidy for Treatment of Specific Diseases (Specific Intractable Diseases)

When a patient with a specified disease (specified intractable disease) receives treatment at a medical institution, their medical expenses are partially subsidized. The subsidized amount is calculated by subtracting the approved “maximum copayment amount” from the amount after health insurance benefits are applied.

(9) Medical Expense Subsidy for Infertility Testing and General Infertility Treatment

Financial assistance is available for those struggling with infertility. When a husband and wife together receive infertility tests, the costs for infertility tests and general infertility treatment are subsidized.

The maximum subsidy limit is 50,000 yen (50% of the copayment amount). The subsidy is available only once for a married couple. To be eligible, the wife must be under 35 years of age when the testing begins.

(10) Medical Expense Subsidy for Specific Infertility Treatment

To reduce the financial burden of specific infertility treatments (in vitro fertilization, intracytoplasmic sperm injection), the treatment costs are partially subsidized for married couples receiving specific infertility treatments. The woman must be 43 years old or younger when the treatments begin.

For those living in Hiroshima City, Kure City, or Fukuyama City, please contact your city hall for more information.

◇Treatments eligible for the subsidy

- In vitro fertilization and intracytoplasmic sperm injection (from here on out referred to as “specific infertility treatment”)
- Operations to extract sperm from the testicle or epididymis (from here on out referred to as “male infertility treatment”) which is performed in combination with specific infertility treatment

◇ Subsidy amount / number of times subsidies are provided

- The subsidy is a maximum of 300,000 yen per couple, per treatment, and up to a total of six treatments per child.  
(up to a total of three treatments per child for a couple whose wife is 40 years or older when they initiate their first subsidized treatment)
- An additional subsidy of up to 150,000 yen may be provided for the first specific infertility treatment.
- Up to 300,000 yen when male infertility treatment is performed as part of specific infertility treatment.
